

Headphone Amp

REFERENCE GUIDE

- 1 Large volume knob. Really makes you want to turn it.
- 2 Crossfeed switch: lets you narrow the stereo feild for less wrap-around-sound
- 3 Indicator LEDs: red for clipping, white for power on
- 4 Two 1/4" TRS stereo headphone outputs
- 5 Power switch. Up is power on
- 6 IEC power inlet. Internal jumpers allow 115VAC or 230VAC
- 7 RCA unbalanced inputs. These feed directly into the volume control bypassing the balanced input stage
- 8 1/4" TRS balanced inputs. These are normalled together so that connecting only one sends the signal into both ears
